

EMPLOYMENT OPPORTUNITIES

Technical Specialists – Feed the Future/Water and Food Systems for Resilient Communities Activity

Tetra Tech International Development, a leading provider of consulting, engineering, and technical services worldwide, is currently accepting expressions of interest from qualified candidates for various potential Technical Specialist positions on an anticipated USAID-funded Feed the Future/Water and Food Systems for Resilient Communities Activity.

The anticipated five-year Activity aims to inclusively and equitably improve integrated water resource management, strengthen food systems, and improve water, sanitation, and hygiene (WASH) service delivery so communities will be empowered to mitigate and adapt to shocks and stressors, thus maintaining their nutrition, health, and livelihood wellbeing.

Tetra Tech seeks mid-career professionals specialized in the following areas:

- * WASH
- * Nutrition
- * Financial Services
- * Agriculture and Value Chain
- * Resilience
- * Natural Resource Management
- * Integrated Water Resource Management
- * Gender and Youth Engagement

Candidates with primary qualifications and experience in more than one of these areas should indicate their interest in multiple positions in their cover letter.

Qualifications:

- * Master's degree (or bachelor's degree with 7+ years of relevant experience) in a field related to the position of interest.
- * At least seven (7) years of relevant professional experience in rural development projects, preferably in the Karamoja region.
- * Experience on USAID -funded projects preferred but not required.
- * Proven track record of collaborating with a diverse array of stakeholders (including district governments, the private sector, and local organizations).
- * Professional fluency (written, oral) in English required.
- * These positions are only open to Ugandan nationals

To be considered applicants must submit the following as part of the on-line process:

- * [Cover Letter]
- * [CV in reverse chronological format]
- * [Optional-Writing Sample – must be sole authorship, maximum 10 pages]

Please indicate where you saw Tetra Tech's IDS ad posted.

Apply on-line at:
<https://bit.ly/TechnicalSpecialistsUgandaFeedtheFuture>

Applications that do not meet the minimum requirements listed above will not be considered. Please ensure that all necessary documents are uploaded, as incomplete applications and/or corrupt files may delay processing of your application or remove you from consideration. No phone calls will be accepted.

2. WASH DCOP Technical Job This full-time position will be based in Kampala, Uganda with frequent travel to the Karamoja region

Responsibilities:

- * Support the Chief of Party (COP) to ensure that the design, implementation, monitoring and evaluation, and progress of all program activities are in accordance with established strategies and meet the goals and objectives of targeted communities, beneficiary groups, USAID, and the Government of Uganda.
- * Provide strategic vision and technical expertise, and manage technical staff focusing on areas such as agricultural extension, nutrition, and value chain development.
- * Ensure that cross-cutting themes such as gender and youth engagement are fully integrated into programming and activities.
- * Provide mentoring, coaching, and supervision for direct technical reports.

Qualifications:

- * Master's degree in agribusiness, business management, economics, international development, or other relevant disciplines.
- * At least 15 years of experience implementing development activities with demonstrated technical expertise in one or more of the following technical disciplines: value chain development, agricultural extension, natural resource management, climate

change or nutrition.

- * At least 5 years of experience leading technical teams and activities for large-scale (>\$25 million) donor-funded projects in East Africa, preferably Uganda. Experience working in the Karamoja region is highly desirable.
- * Proven ability to maintain productive working relationships with donor representatives, government officials, private sector actors, and other stakeholders.
- * Ability to serve as acting Chief of Party in his/her absence.
- * Fluency in English required.
- * Uganda nationals are strongly encouraged to apply.

To be considered applicants must submit the following as part of the on-line process:

- * [Cover Letter]
- * [CV in reverse chronological format]
- * [Optional-Writing Sample – must be sole authorship, maximum 10 pages]

Please indicate where you saw Tetra Tech's IDS ad posted.

3. WASH COP JOB This full-time position will be based in Kampala, Uganda

Responsibilities:

- * Provide leadership, management, and general technical direction for the entire Activity, ensuring an integrated vision among different technical components and actors.
- * Identify potential risks to successful Activity implementation and recommend and implement appropriate adjustments.
- * Oversee contract management and technical implementation.
- * Serve as the primary liaison with USAID, the Government of Uganda, and other national and sub-national partners, responding to technical and administrative matters and adjusting programs and operations in response to USAID's technical direction.
- * Manage in-country team and ensure the development of

high-quality deliverables and the provision of strong technical support to project partners.

Qualifications:

- * Master's degree or higher in international development, water supply, and sanitation, water resources management, economics, agriculture, public administration, or another relevant field.
- * At least 15 years of professional experience working on, designing, and/or implementing projects related to water sector governance and finance, agriculture systems and value chains, private sector development or other related fields.
- * Extensive experience managing large donor-funded programs in Sub-Saharan Africa, preferably in Eastern Africa.
- * Prior USAID COP experience for large (+30M) activities in the areas of Feed the Future, WASH, Resilience, or Integrated Water Resource Management.
- * Demonstrated ability to manage a diverse team of experts and partners.
- * Demonstrated technical knowledge of agriculture in arid landscapes, value chains, water resource management, resilience, and adaptation, etc.
- * Excellent report writing and communication skills are required.
- * Uganda and East African nationals are strongly encouraged to apply.

To be considered applicants must submit the following as part of the on-line process:

- * [Cover Letter]
- * [CV in reverse chronological format]
- * [Optional-Writing Sample – must be sole authorship, maximum 10 pages]
